

FIREFIGHTER TRAINING

 **Advancing Hand Lines, Part 2 of 2**

038-0305

In the second part of our advancing hand lines series, we continue to look at the basics of advancing hoselines. In part two, we review operational guidelines. We'll also review what to do when the attack line does not reach the front door.

NFPA Standards: 1001 (2002); Accreditation Academy CE: 1 hour

 **Fire Origin and Cause Determination, Part 4 of 5: Ignition Sources**

038-0024

In the fourth show of our FETN series on fire origin and cause determination, we will continue to present the factors you must take into consideration when conducting an investigation. This episode, however, focuses on ignition sources; it includes such topics as electrical, accidental, arson, and incendiary devices.

Accreditation Academy CE: 1 hour

 **Protecting America: Mass Transit/Mass Terror**

911-0004

This program looks at the specific weaknesses of our country's mass transit system and outlines strategies for protecting the traveling public. The Tokyo subway sarin gas attack and the World Trade Center attacks underscore the vulnerabilities we face.

Accreditation Academy CE: 1 hour

HOMELAND ONE

 **Awareness Level: Self-Protection Measures for WMD Incidents, Part 2 of 2**

948-1011

This course describes the priorities for protecting individuals during incidents involving WMD and actions that first responders can take to protect themselves and others.

Based on ODP Guidelines; Academy CE: 1 hour

EENET

More programs from EENET are coming, but at the time of this printing, the remainder of the March 2005 schedule had not been released. Visit FETN.com for updated EENET information.

AMERICAN HEAT

 **Industry of a Man: The Fire Career of Red Adair**

463-0305

Throughout the years countless people have influenced their professions, and the fire service can boast of many such individuals. One of them is Paul Neal "Red" Adair. Red's contributions to the fire service have profoundly altered the way that oil well fires are fought. One of his notable achievements is the extinguishment of 117 oil wells set on fire by the retreating Iraqi army during the 1991 Gulf War. Red and his company set the standard for extinguishing oil well fires. This presentation will look at the life of Red Adair and present leadership lessons learned from this fire service leader.

Academy CE: 1.5 hours

 **Accountability: Across the Pond**

463-0304

In the United States in 2002, 100 firefighters died in the line of duty; during that same year, the United Kingdom had no firefighter fatalities. Why, you ask? Although some differences between the two countries do exist, such as fire service organization, building construction, country size, and so on, the fundamentals of firefighting are the same. In this American Heat we'll take a look at one safety practice in particular: the breathing apparatus entry control officer. What is this individual's role? How does he help save lives? Is it easy and affordable for the American fire service to adopt? Can we learn something from our brothers across the pond?

NFPA Standards: 1561 (2002)

Academy CE: 1.5 hours

**American Heat Essentials
Fires That Changed the Fire Service: Wildland Firefighting**

500-0165

This edition of "Fires That Changed the Fire Service" takes you on a historic arc that spans half a century of wildland firefighting. From Mann Gulch, Mont., to Storm King, Colo., FETN shows you the incidents that changed the way the fire service approached wildland fires.

PULSE

Chest and Abdominal Trauma

464-0305

This edition of PULSE provides an extensive review of chest and abdominal anatomy and physiology. Students will learn how to assess and manage a variety of chest and abdominal injuries. The issues of fluid resuscitation and chest decompression techniques are also highlighted.

FETN Credit: 2 hours

(Please check www.fetn.com for the most up-to-date approval #'s for CECBEMS, CNE, MA DOH & PA DOH.)

**EMS Operations Environment
PULSE Plus: Medical Surveillance**

464-0304

Many EMS systems do not regularly have to face difficult situations dealing with offshore, wilderness, or tactical EMS and/or special events. This does not mean that valuable lessons cannot be learned from individuals who do handle these situations on a regular basis. From large crowds to extended transport times to hazardous environments, these EMS personnel are very adept to handling adversity. This episode of PULSE will cover these topics, with PULSE Plus dealing specifically with medical surveillance.
