

### FIREFIGHTER TRAINING

**NEW** **Ventilation**

038-0405

**A+** This course will discuss the basic elements of ventilation and how to apply the proper techniques.

**A+** NFPA 1001 (2002)

**A+** **Fire Origin & Cause Determination, Part 5 of 5: Structure Fire Investigation, A Systematic Approach**

038-0025

**A+** In the fifth show of our FETN series on fire origin and cause determination, we continue to present the factors you must take into consideration when conducting an investigation. This episode focuses on structure fire investigation. It includes topics such as basic investigation procedures, safety precautions and equipment requirements, methods of properly securing the fire building, and sources of investigation assistance.

### HOMELAND SECURITY

**A+** **Homeland One Preparedness Level: Protection of Potential and Actual Crime Scenes, Part 1 of 2**

948-1106

**A+** This course covers the understanding and implementation of procedures for the protection and preservation of crime scenes at WMD and hazardous materials events. This course includes a primer in the roles of Federal agencies related to a WMD event.

**A+** NFPA 1561 (2002) 1143 (2003)

**A+** **Protecting America Bio-Terror 101, Part 1 of 2**

911-0001

**A+** This program takes a look at bio-terrorism and how to deal with it from the first responder and medical point of view. Specifically, we'll examine the three types of anthrax and how they are contracted. This training is highlighted with information from an Aurora, Colo., bio-terror drill.

### EENET

More programs from EENET are coming, but at the time of this printing, the remainder of the April 2005 schedule had not been released. Visit FETN.com for updated EENET information.

### AMERICAN HEAT

**NEW** **Agricultural Incidents**

463-0405

**A+** This month's American heat focuses on agricultural incidents. We will demonstrate new technology and techniques for responding to farm-related accidents, including equipment mishaps, injuries, and other such occurrences in an agricultural setting.

**A+** NFPA 1006 (2003)

**A+** **American Heat Essentials Firestorm '03: Safe Structure Protection**

463-0404

**A+** California is the backdrop for this American Heat training module. Join us as we take an in-depth look at the tactics used by the San Bernardino City Fire Department during the old fire in 2003. We also look at hazards that would likely be encountered in a wildfire and discuss personal safety, protective gear and potential health problems.

**A+** **American Heat Essentials Hepatitis C**

463-1002

**A+** The wife of one dying firefighter said it best: "Hepatitis C is a hero's disease, and it must be fought with a hero's response." This program will take you beyond the dry facts and figures of your typical EMS CE program—because Hepatitis C is not about facts and figures, it's about people. Recommended prevention and treatment practices from CDC are included. Special thanks to the IAFF for production assistance.

### PULSE

**NEW** **PULSE: Technology in EMS**

464-0405

**A+** More technology is coming to the field of emergency medical services. Knowledge of these systems can help in the

response to patients. Civilian vehicles contain computers and restraint systems that can make them safer and provide information to EMS personnel. Inside ambulances, innovations in communications and tracking technology are helping make calls run more efficiently. Some departments use computers in the ambulance and electronic patient charting to aid in data collection and billing. After looking at the applications of computers in the field, see how computers are used to help handle the scheduling of a department's personnel.

**A+** **PULSE: The Power of Prevention**

464-0404

**A+** The associate medical director for Boston EMS told PULSE that "I really don't think that many EMS providers do their jobs...day in and day out...without feeling a need to stop the cycle." That's why Boston EMS participates in several injury prevention programs. We'll look at the success Boston and other cities have had in reducing the number of injuries in their cities. Also see how to develop or enhance prevention programs in your community. Then, PULSE Plus profiles one department's EMS prevention program.
