

FIREFIGHTER TRAINING

NEW **Safety, Security and Protection of the Firehouse**
038-0505
A+ This program discusses the important topic of protecting the firehouse. We'll demonstrate firehouse security and safety techniques that you will need to know.

NEW **FETN Special: TTY**
415-0505
A+ Most calls into a dispatch center will come from people using a standard telephone to verbally report an emergency, but in some cases a dispatcher will only hear tones instead of words. It may be because the caller is using a TTY—or text telephone—because he or she is unable to speak. Federal mandates and your desire to help people in need makes it critical for you to know how to properly answer these calls. This program explains some of the different devices used, and how to properly communicate with TTY users in need of emergency help.

NEW **FETN Special**
IAFC Update 2005, Part 1 of 2
038-4012
Featuring IAFC president Bob Dipoli, this is the first installment of two annual communiqués from IAFC to the American fire service. Twice a year IAFC uses FETN, IAFC's official training and communications network, to brief rank and file on issues and topics of interest to the fire service. This initiative brings us together on subjects that we can jointly benefit from. Be sure to tune in and catch up on what may be affecting you and your department during 2005.

Big Rig Rescue, Part 1 of 3: Anatomy of a Big Rig
732-0118
If a road runs anywhere near your department, whether a rural farm-to-market or a major highway, you run the risk of facing a big rig accident. This program kicks off our three-part Big Rig series. In this program you will learn the ins and outs of various big rigs by examining them before they are wrecked.

HOMELAND SECURITY

A+ **Homeland One Preparedness Level**
Part 2 of 2: Protection of Potential and Actual Crime Scenes
948-1107
This second installment of a two-program series deals with procedures to protect and preserve crime scenes at a WMD event. This installment specifically addresses how to protect physical evidence and how to deal with witnesses or bystanders who may have valuable information regarding the incident or event.

Homeland Security
Protecting America, Part 2 of 2: Bio-Terror 101
911-0002
This program continues our look at bio-terrorism in general and anthrax in particular. How do you handle suspected anthrax cases and all the requests for assistance?

EENET

More programs from EENET are coming, but at the time of this printing, the remainder of the May 2005 schedule had not been released. Visit FETN.com for updated EENET information.

AMERICAN HEAT

NEW **American Heat**
Fire on Trial
463-0505
A+ Firefighters may be called upon to testify in a variety of legal cases, from arson to domestic violence. This program shares tips that ensure a first responder's contribution to the justice system is thorough and appropriate, including what to wear in court and how to handle cross-examination. We also show you how to gather critical information at the scene of an incident without compromising your safety or job performance.

A+ **American Heat**
Against the Wind: Mother Nature's Fury
463-0504
This presentation examines firefighting under strenuous weather conditions. Several visits with coastal fire depart-

ments are featured, and Hurricane Isabel is discussed as an example of the kind of extreme conditions firefighting personnel may encounter.

A+ **American Heat Essentials**
Thermal Imaging Cameras
500-0174
Thermal imaging cameras are becoming the most important new firefighting tool since the SCBA. For every life that is saved by one, another may be jeopardized. Do you know the dangers? This program demonstrates several applications of thermal imaging cameras and what signs to look for when using them. You'll see some dramatic stories about how thermal imaging cameras have changed people's lives, in more ways than you might expect.

PULSE

NEW **PULSE**
Constant Threats: Terrorism and Disasters
464-0505
A+ This course reviews the most current issues pertinent to EMS in terms of terrorism and disaster-related issues. Highlights include a review of the TOPOFF exercises, an introductory overview of the National Response Plan, and critical infrastructure protections issues for EMS.

A+ **PULSE**
Shock Management
464-0504
People can suffer from several different types of shock, including anaphylactic, neurogenic, hypovolemic, septic, and cardiogenic. Patients suffering from shock may present a variety of symptoms and behavior, several treatment options are available. This PULSE presentation provides an overview of symptoms and treatment for the various types of shock. PULSE Plus focuses on the usage of Epinephrine 1:1,000 vs. Epi 1:10,000 in the treatment of shock.
