

FIREFIGHTER TRAINING

 **HazMat Awareness, Part 8 of 8: Protective Actions, Clothing and Labels**

737-0208

  This course, part eight of an eight-part series, describes protective actions such as time, distance, and shielding as well as the “golden rule” of chemical protective clothing as it pertains to hazardous materials. A list of protective product labels as it pertains to hazardous materials and the six steps to take after a hazardous material has been detected are also outlined.

 **Safety, Security and Protection of the Firehouse**

038-0505

  This program discusses an important topic: protection of the firehouse. We'll demonstrate firehouse security and safety techniques that you will need to know.

 **Managing the Fireground, Part 1 of 2: ICS for RIT**

038-3027

  Now that we have RITs, many departments don't know what to do with them. This program will show you where RITs fit in, how to communicate with them, and how to get some value out of your RIT “standby” operations. NFPA 1410 (2000) 1-3.16

 **Dignity Despite Disaster, Part 3 of 4: Managing a Line of Duty Death**

038-0017

  Possibly one of the hardest parts of a line of duty death is delivering the death notification. We will visit Dan McGuire at his seminar as he does a re-enactment of the notification. We will go over what to do in the situation and more importantly what not to do when delivering the news. This important information will be covered with the basis of treating the incident with tradition, honor, and respect. Join us for part three of this crucial series.

PREPNET

More programs from PREPnet are coming, but at the time of this printing, the remainder of the May 2006 schedule had not been released. Visit FETN.com for updated PREPnet information.

AMERICAN HEAT

 **American Heat: Wildfires**

463-0506

  This program is intended to acquaint students with the basics of wildland firefighting. For some, it will simply be an important review of things they already know. For others, it may be the first time that they have ever been introduced to these important safety tips that have the potential to save the life of a firefighter. The NFPA 1143, Standard for Wildland Fire Management, 2003 Edition, is used as reference.

 **American Heat: Fire on Trial**

463-0505

  Firefighters may be called to testify in any number of legal issues from arson to domestic violence. In this program we will explore the steps a first responder should take to assure that their contribution to the justice system is as thorough as possible. From what to wear to court, to handling cross-examination. We will also look at some techniques firefighters can use to gather as much information when arriving on the scene of an incident, without compromising their safety or job performance.

PULSE: EMERGENCY MEDICAL UPDATE

 **PULSE: Recreational Drugs**

464-0506

  Despite ongoing efforts, recreational drug use is growing—and changing—with the population. Recreational drug use is anything but child's play, and EMS personnel must be prepared to manage prehospital care of patients affected by recreational drugs. This learning activity explores the most common recreational drugs and their affects as well as how you can care for drug users. This activity also looks at the statistics and evaluates the trends driving recreational drug use.

 **PULSE: Constant Threats: Terrorism and Disasters**

464-0505

  This course is a review of the most current issues pertinent to EMS in terms of terrorism and disaster-related issues. Highlights include a review of the TOPOFF exercises, an introductory overview of the National Response Plan and Critical Infrastructure Protections Issues for EMS.
