

DECEMBER 2009 - TRAINING CALENDAR

Tested	CATEGORY	SHOW TITLE	SHOW #	LENGTH	SYNOPSIS
A+	PULSE	NEW Active Shooter	464-1209	30 minute video plus course materials	This course discusses the challenging aspects of dealing with an active shooter crisis. The course reviews aspects of incident command, profile of a typical gunman, types of weapons, and obstacles that may be encountered. It also reviews triage and treatment of patients with war-like trauma.
A+	American Heat	NEW Full-Scale Exercises	463-1209	30 minute video plus course materials	Conducting a full-scale exercise involves much more than just responding to a simulated incident. Substantial planning involving all stakeholders sets the tone for the entire project. A fully scripted, realistic scenario gives participating agencies the sense of a real world incident. Thoughtful identification of key evaluation points, including detailed job aids for exercise evaluators, along with a thorough, constructive after-action review, produces positive results that are beneficial to all participants. Join us as we go behind the scenes of a full-scale hazardous materials response exercise at Kyle Field on the campus of Texas A&M University.
A+	Firefighter Training	NEW Fire Investigation From a Codes Standpoint	038-1209	30 minute video plus course materials	This course examines the fire investigation process from a codes standpoint, paying close attention to NFPA 921. It also examines conditions relative to fire and smoke spread that are used in fire investigation, as well as how codes can be applied in determining cause of property damage and cause of bodily injury or loss of life in a fire incident.
A+	Firefighter Training	Rehabilitation in the Fire Service, Part 2	700-0584	30 minute video plus course materials	Establishing the rehab sector is more than just sticking someone in an orange vest. In this course, we look at some of the historical aspects of rehab. We explore what it is and why we need it. Finally, we look at the various functions of rehab and its relationship to the Incident Management System.
A+	Firefighter Training	Confined Space Rescue: OSHA Penalties and Consequences	750-0008	30 minute video plus course materials	Join Lt. Mike Cook and Chief Randy Corbin for a look at non-entry rescue techniques. How do you decide whether to attempt a non-entry CSR, and what precautions should you take? Also, find out why OSHA rules can save the lives of your team and confined space victims.
A+	PULSE	Respiratory Management of the Morbidly Obese	464-1206	30 minute video plus course materials	With the rising epidemic of obesity in this country, EMS providers must be aware of the respiratory challenges presented by the morbidly obese pulmonary complications, especially when trauma is involved. First responders must be aware of other challenges such as medication dosing, patient positioning, and patient transport. Join us for an informative discussion on the emergency care considerations for this growing population.
A+	Firefighter Training	HazMat Refresher Course, Part 1: First Responder Awareness Level	737-0106	30 minute video plus course materials	What laws and regulations does the fire service have to comply with, and why? This course takes us into the courtroom for a look at these regulatory requirements from all angles.

Tested	CATEGORY	SHOW TITLE	SHOW #	LENGTH	SYNOPSIS
A+	American Heat	Slaying the Dragon: Industrial Fires	463-0204	60 minute video plus course materials	Industrial firefighters and emergency response team (ERT) members face a unique situation when compared with their municipal firefighting colleagues. They face many of the same hazards, but their motivation and training frequently differ. This course highlights one department's struggle to extinguish a tank fire near Monterey, Calif. We meet Dwight Williams, one of the most successful industrial firefighters in the world. Plus, we catch fire brigades in action at an industrial fire training school in Beaumont, Texas.
A+	American Heat	Accountability: Across the Pond	463-0304	60 minute video plus course materials	Although some differences between the United States and Great Britain are apparent, the fundamentals of firefighting are the same. In this installment of American Heat, we take a look at one safety practice in particular: the breathing apparatus entry control officer.
A+	Firefighter Training	FETN Special: TTY: Call Recognition and Processing	415-0505	30 minute video plus course materials	Most calls into a dispatch center will come from people using a standard telephone to verbally report an emergency, but in some cases, a dispatcher will only hear tones instead of words. It may be because the caller is using a TTY-or text telephone-because he or she is unable to speak. Federal mandates and your desire to help people in need makes it critical for you to know how to properly answer these calls. This course explains some of the different devices used and how to properly communicate with TTY users in need of emergency help.

DECEMBER 2009 TRAINING CALENDAR

Air times are both A.M. & P.M.				Air Block	Air Block	Air Block	Air Block
EST	CST	MST	PST	1-3, 12-14, 22-24	5-7, 15-17, 26-28	8-10, 19-21, 29-31	4, 11, 18, 25
